Care & Maintenance Recommendations

Home Repairs -When making home repairs, renovations, remodeling or other activities that affect siding, be sure to comply with Shakertown's application recommendations.

Caulk Repairs -When caulking needs repair use a non-hardening caulk. Remove loose caulk. Install caulking in accordance with the caulk manufacturer's recommendations.

Loose Siding -Loose siding or shingles are easily secured using a hot-dipped galvanized or stainless steel 7d siding nail. Refer to Shakertown application recommendations.

Cleaning -Dirt, debris, mold, mildew or other conditions common to all siding materials are easily removed from using a soft brush with a mild cleanser. Local paint stores can supply you cleaners specific for cedar siding if you experience stubborn mold or mildew. Always test a small hidden area of the siding before cleaning the entire wall.

Stains and Paints -All siding products will last their full life when stained or painted. These stains and paints have limited life spans and will have to re-applied from time to time. Refer to your selected finish manufacturer recommendations for proper application periods, application methods and application rates.
